

# **Career Prep 3:**

## **The Journey Ahead**

### **Course Description & Learning Objectives**

#### **Overview**

Need help with an answer? Google it! Need directions to the event? Map it! Want to know if it'll rain? Weather satellite! We live in an age where the information we need is almost always at the tips of our fingertips, and we only have to pull out a handy app or tool to get the help we need. Technology has provided us great assistance in getting us the knowledge we want, when we want it, in order to get us to where we want to go.

But what about those bigger life journeys, like your career choices? Can an app help you get to the end of that?

The Journey Ahead of you right now is far more complex than a simple query, but it shouldn't be daunting. With the right guides, support, tools, and help (such as your teachers, and this course!), you can start this latest journey toward your future career in confidence.

We want to help escort you through an exploratory journey toward the best possible career path options for you!

#### **See the End... from the Beginning!**

This course will compel you to think about two things:

1. Where you are right now, and...
2. Where you want to be in the future!

Even if the future seems far away, believe it or not, decisions and information you gather now can directly affect the path before you. Like a plant, the seeds you bury today are what shape and form the harvest of the future.

A track and field star doesn't expect to wake up on race day and complete a full marathon. It takes practice. It takes preparation. The same goes for preparing for your future career!

### **Unit 3 Outline**
